1 Template
Fold the plate 90°.

2 Door Frame
Template
Door leaf
First close the door, then place the upper side of the template on the door frame, while adjusting the left side, next to the door leaf.

3 Door Frame
Template
Door leaf
Mark screw positions of armature plate and door magnetic lock on door leaf and frame, respectively.

4 Door leaf
Drill holes based on the marked positions.

5 Assemble items based on the picture.

6 Setpin
Strike the pin into the armature plate slightly (to avoid movement).

7 Assemble items based on the picture (add washer accordingly). You must add rubber ring.

8 Rubber ring
Place the rubber ring between armature plate and door leaf.

9 Allen Key
Use Allen key to remove the mounting plate from lock body.

10 Wire
Fix the mounting plate on the door frame according to the holes drilled earlier.

11 Allen Key
Use Allen key to screw the lock body on the mounting plate.

12 Wire
Close the door to test holding force. The angle between armature plate and magnetic lock can be adjusted by adding or reducing washers.

13 Screw door
After all the appropriate procedures, the holding force can be maximized. Finally, fix the tamper screw.
