# KeyPad TouchScreen Jeweller

Wireless keypad with a touch screen supporting authentication via Pass, Tag, smartphones, and codes

# Intelligent security and automation management

KeyPad TouchScreen Jeweller is designed for intuitive and convenient system control. The graphical interface, sound notifications, and LED indication of the keypad ensure that users' commands and the system's responses are delivered without fail. Users can view the latest alarms and events directly on the keypad to stay informed about recent system activity. If a malfunction is detected during the integrity check, the keypad clearly indicates the cause. This way, users are always aware of the system state and any necessary actions.

# Key features

- Easy security group management
- Control tab for automation devices with toggles indicating the current device state<sup>1</sup>
- Sound and LED indication for alarms, opening doors (Chime), delays when entering/leaving, and other events
- Keypad activation when a user approaches the device and during delays when entering
- Automatic backlight brightness adjustment
- On-screen notification specifying the cause of a malfunction when arming the system
- Log with latest events available directly from the keypad screen

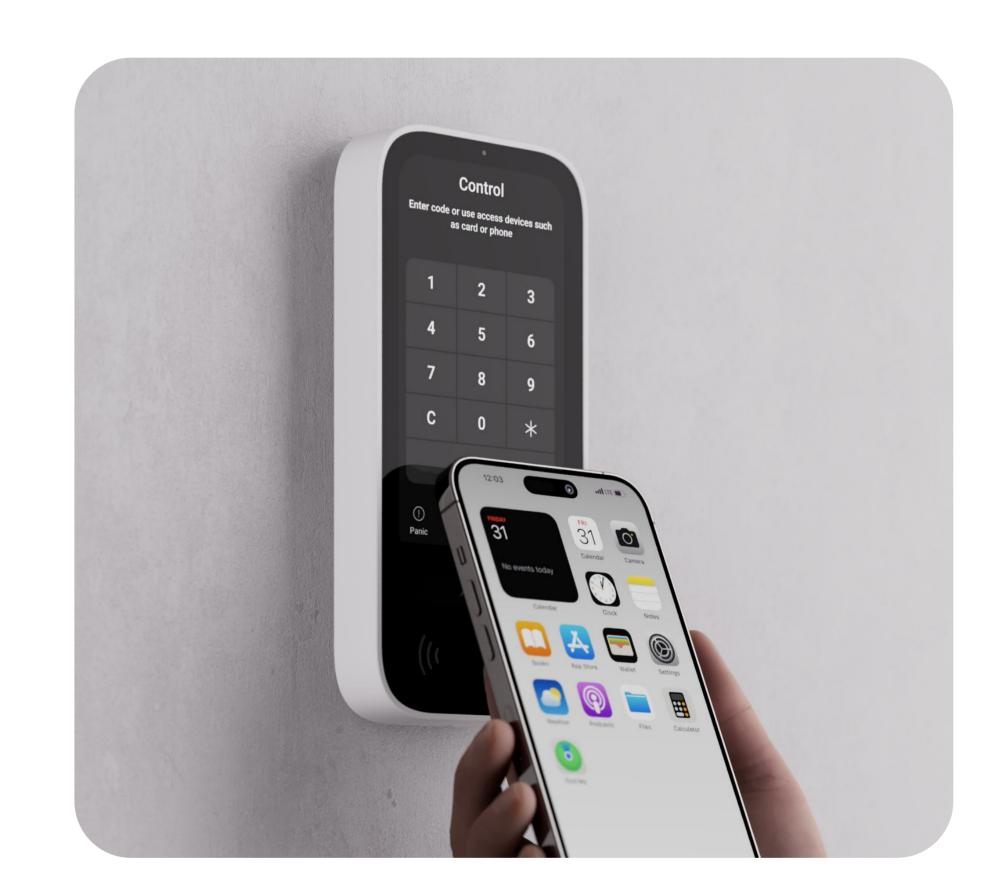

### Three fast and secure authentication methods

Pass card or Tag key fob

Smartphone

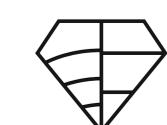

Codes

# All set in case of emergency

- Keypad auto-locking when someone tries to guess the code
- Duress codes to simulate system disarming and send a silent alarm to the security company
- Protection against authentication via unauthorized access devices
- Three emergency buttons: panic, fire, and auxiliary alert

# Jeweller and Wings communication technologies

- Up to 1,700 m (5,550 ft) of radio communication between the keypad and a hub or range extender in an open space
- Data encryption throughout the transmission process
- Regular polling to display the current device state
- Frequency hopping to prevent radio interference and jamming

# Complex sabotage protection

- Tamper alarm to notify of keypad dismantling
- Keypad authentication to prevent spoofing
- Detection of communication loss between the keypad and a hub

## Easy installation and setup

- Pairing with a hub by scanning the QR code
- Remote control and configuration via Ajax apps
- SmartBracket mounting panel for easy installation without disassembling the device enclosure
- Over-the-air firmware updates<sup>2</sup>

Compliance	Communication with a hub or range extender	Features	Display
EN 50131 (Grade 2)	or range exteriaci		
PD 6662:2017	Jeweller and Wings	Contactless access	Type
INCERT UL	communication technologies	up to 200 cards and key fobs	IPS, capacitive touch screen
	Frequency bands	Bluetooth low energy (BLE) support	Diagonal
Compatibility with hubs	866.0-866.5 MHz		5"
and range extenders	868.0-868.6 MHz	Access codes	
	868.7-869.2 MHz		Resolution
For detailed information, scan	905.0-926.5 MHz	Duress codes	480 × 854 px
the QR code or follow the link:	915.85-926.5 MHz		
	921.0-922.0 MHz	Emergency buttons	
	Depends on the sales region	Panic, fire, auxiliary alert	
	Communication range	Fire alarm muting	
	up to 1,700 m		
ajax.systems/tools/devices-	up to 5,550 ft	Log with latest events	
compatibility/?models=KP.TS.J	In an open space		

### Power supply

**Battery** 6 × AA battery (pre-installed)

Battery life up to 1.5 years

Optional external power supply 10.5-14 V = 0.5 A

When external power is connected, the batteries operate as a backup power supply.

### Installation

Operating temperature range from -10 °C to +40 °C from 14 °F to 104 °F

Operating humidity up to 75%

### **Enclosure**

Color black, white

**Dimensions**  $171.5 \times 82.1 \times 26 \text{ mm}$ 

 $6.75" \times 3.23" \times 1.02"$ 

### Weight 327 g

11.53 oz

Tamper

### Complete set

KeyPad TouchScreen Jeweller 6 × AA battery (pre-installed) SmartBracket mounting panel

Installation kit Quick start guide

<sup>&</sup>lt;sup>1</sup> When KeyPad TouchScreen Jeweller controls automation devices that operate in the bistable mode.

<sup>&</sup>lt;sup>2</sup> To receive over-the-air updates, KeyPad TouchScreen Jeweller needs to be connected to the external power supply.
