

# DH-IPC-PFW83242-A180-S2

# 4 × 8 MP Multi-Sensor Panoramic Bullet WizMind Network Camera

Launched by Dahua Technology, Dahua WizMind is a full portfolio of solutions composed of project-oriented products including IPC, IVSS, NVR, PTZ, XVR, Thermal and software platform which adopts industry-leading deep learning algorithms. Focusing on customer's requirements, WizMind provides precise, reliable and comprehensive Al solutions for verticals.

### **Series Overview**

The splicing camera supports a 180° panoramic view and 4-channel hardware splicing to realize HD panoramic surveillance. The camera supports crowd situation analysis, vehicle situation analysis, and perimeter protection. It is widely applied in various scenes such as squares, airports, safe city, and traffic.

#### **Functions**

#### **Panoramic Splicing**

With advanced splicing algorithm, Dahua Panoramic Splicing technology deletes overlapped area and splices multiple images to be a complete panorama. The field of view of the spliced image can be up to 360°, which largely improves surveillance efficiency and user experience. Generally, after splicing, the field of view of four-sensor camera can be 180°, and the field of view of eight-sensor camera can be 360°.

#### **Distortion Correction**

With advanced distortion correction algorithm, Dahua Distortion Correction corrects the image distortion in both horizontal and vertical directions to be consistent with the actual situation.

#### **AR Panorama**

Dahua AR panorama technology generates wide-field of view through panoramic merging and splicing. The software overlaps the cameras as tags in the image. Click the tag to display the corresponding camera video, which makes monitoring visual and convenient, and improves command efficiency.

## **EPTZ**

With advanced target detection and tracking algorithms, Dahua EPTZ technology can simultaneously zoom in and track multiple humans and vehicles that trigger alarms. It provides rich details and a panoramic view at the same time.

- 4 × 8MP, 1/1.8" CMOS image sensor, low illuminance, high image
- Outputs max. 32MP (8192 × 3840) @25/30 fps; with intelligent functions enabled, it can output 32MP (8192 × 3840) @20 fps
- Built-in IR LED, and the max. illumination distance is 30 m.
- ROI, SMART H.264+/H.265+, flexible coding, applicable to various bandwidth and storage environments.
- · Intelligent functions: Crowd Distribution Map, Vehicle Density, Perimeter Protection, EPTZ.
- · Support image correction.
- · Alarm: 2 in, 2 out; audio: 1 in, 1 out; 485; BNC; supports max. 256G SD
- 12 VDC/24 VAC/PoE power supply; easy for installation
- IP67 and IK10 protection
- AR panorama technology; various AR tags can be overlaid.

#### **Crowd Density**

With deep learning algorithm, Dahua Crowd Density technology can detect the crowd density on the image, and display it on heat map; it can detect people quantity and density in selected area and set threshold. When the number or density is larger or smaller than the threshold, it triggers linkage.

#### **Vehicle Density**

With deep learning algorithm, Dahua Vehicle Density technology analyses the vehicle situation in the image, such as vehicle number in selected area. You can set threshold, and when the number is larger or smaller than the threshold, it triggers linkage.

## **Perimeter Protection**

With deep learning algorithm, Dahua Perimeter Protection technology can recognize human and vehicle accurately. In restricted area (such as pedestrian area and vehicle area), the false alarms of intelligent detection based on target type (such as tripwire, intrusion) are largely reduced.

## **Cyber Security**

Dahua network cameras employ a series of security technologies, including security authentication and authorization, access control protocols, trusted protection, encrypted transmission and encrypted storage. These technologies improve the camera's defense against external cyber threats and prevent malicious programs from compromising the device.

Camera	Technical Specification					Third stream: $2304 \times 1080@(1-25/30 \text{ fps})$ Prioritize intelligence: Main stream: $8192 \times 3840@(1-20 \text{ fps})$ Sub stream: $1280 \times 600@(1-20 \text{ fps})$ Third stream: $2304 \times 1080@(1-20 \text{ fps})$ *The values above are the max. frame rates of each stream; for multiple streams, the values will be subjected
